

Swell solar solutions Liechtenstein

Last week sonnen said that it has teamed up with Utah-headquartered solar installer ES Solar on a battery retrofit programme for RMP's approximately 50,000 customers that have rooftop solar. The solar-plus-storage systems will become dispatchable grid assets in the hands of the utility.

Swell Energy, a virtual power plant (VPP) provider that collaborated with multiple utilities, is reportedly shutting down just months after it acquired solar and storage installer Renu Energy, Latitude Media reports.. Although the company has not officially announced the end, several former employees spoke with Latitude Media, alleging that Swell began a series of ...

Solar energy is a clean, renewable source of power that can help us decrease our carbon footprint while also saving on energy costs in the long run. Imagine being able to power your home or business with the abundant and freely available sunlight, all while doing your part to protect the environment. This is the vision that Swell Solar Soluti

Renu Energy Solutions is a high-quality solar energy systems installer operating across the South East, specializing in turn-key solar solutions for residential and commercial properties. Renu Energy Solutions was founded in 2010 and is based in Charlotte, North Carolina.

At least until recently, Swell has both installed and financed distributed energy storage, aggregating them into VPPs. In late 2022, the company raised a Series B round from investors that included Softbank. That funding, Swell said, would target the rollout of customer energy storage systems and virtual power plants.
