Does Myanmar have a potential for solar energy?

"Myanmar has an incredible potential for solar energy, but the government still has a lot of work to do to unleash the potential and to attract foreign direct investments into Myanmar's solar industry," noted Stefano Mantellassi, Chair of the SolarPower Europe Emerging Markets Taskforce.

Why does Myanmar have less hydro power than natural gas?

The remaining fuel (coal and oil) accounted for only 3.0% of the total generation mix. During 2019, the share of hydro supply was less than natural gas. This was because of the flexibility in the natural gas power generation in Myanmar. Under the BAU scenario, oil-based power plants will cease operation by 2030.
