

The Gambia solar depot srl

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

What is the energy system in Gambia?

The Gambian electricity network mainly consists of minigrids that the government hopes to improve by transforming into hybrid minigrids, integrated with renewable energy generation capacity. With an electricity access rate of just 35%, Gambia introduced the Renewable Energy Act to promote clean energy in 2013.

Does the European Investment Bank support a new solar plan in Gambia?

Mr. Ambroise Fayolle, Vice-President at the European Investment Bank (EIB) "I am delighted that the European Investment Bank is supporting this new solar plan with such economic and social impact for populations in Gambia, particularly in rural areas.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

What is the energy access rate in Gambia?

With an electricity access rate of just 35%, Gambia introduced the Renewable Energy Act to promote clean energy in 2013. This content is protected by copyright and may not be reused.

Does the Gambia have a demand tailwind?

The Gambia's absolute electricity consumption and per capita consumption have been steadily increasing since 2000 demonstrating the country's demand tailwinds. This trend is expected to continue in the near-term with a rising population and the continued expansions of businesses.
