

The United States imports photovoltaic panels from Vietnam

Is the US solar panel manufacturing industry injured by importing solar panels?

The U.S. International Trade Commission (USITC) today determined that there is a reasonable indication that the U.S. solar panel manufacturing industry is materially injured by imports of silicon solar cells and panels from Cambodia, Malaysia, Thailand and Vietnam.

What percentage of solar panels come from Vietnam?

Over 34 percent of solar photovoltaic (PV) modules imported into the U.S. between January and November 2023 came from Vietnam. In 2012, the Obama administration implemented duties on solar equipment imported from China to counteract the competitive edge held by foreign companies.

Are crystalline silicon photovoltaic cells antidumping or countervailing duty?

On May 15, 2024, the U.S. Department of Commerce (Commerce) announced the initiation of antidumping (AD) and countervailing duty (CVD) investigations of crystalline silicon photovoltaic cells, whether or not assembled into modules, from Cambodia, Malaysia, Thailand, and the Socialist Republic of Vietnam (Vietnam).

ALLEGED DUMPING RATES:

Are imports of solar cells injuring the US domestic industry?

The Petitioner asserts that imports of solar cells and modules from these countries, which represented nearly 80% of U.S. imports of solar cells and modules in 2023, are injuring the U.S. domestic industry because they are sold in the United States for "less than normal value" (i.e., dumped) and unfairly subsidized.

Can I import solar cells from Cambodia?

Imports of solar cells and modules from Cambodia, Malaysia, Thailand, and Vietnam will not be subject to suspension of liquidation or cash deposit requirements if accompanied by a certification attesting that they are not circumventing the ADD/CVD orders. There are three types of certifications:

Are crystalline silicon photovoltaic cells subsidized by Cambodia?

The USITC also determined that there is a reasonable indication that a U.S. industry is threatened with material injury by reason of Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled into Modules, from Cambodia that are allegedly subsidized by the government of Cambodia.

On August 18, 2023, the US Department of Commerce ("Commerce") issued its final affirmative determinations that solar cells and modules completed in Cambodia, Malaysia, Thailand, or ...

The U.S. International Trade Commission (USITC) today determined that there is a reasonable indication that the U.S. solar panel manufacturing industry is materially injured by imports of silicon solar cells and ...

The United States imports photovoltaic panels from Vietnam

On April 24, 2024, a coalition of four U.S. producers of crystalline silicon photovoltaic cells and modules filed an antidumping and countervailing duty (AD/CVD) petition on imports of ...

On December 27, 2022, this release was updated for clarity and to include a link to the Federal Register Notice titled, "Procedures Covering Suspension of Liquidation, Duties and Estimated ...

Such an attractive duty makes it profitable to import photovoltaic modules to both the European Union and the United States. Certificates for photovoltaic panels in the EU. There are two sets of elements in the photovoltaic panel system: ...

The U.S. Commerce Department on Tuesday announced anti-subsidy countervailing duties on solar cells imported by companies in Vietnam, Cambodia, Malaysia and Thailand that were lower than some ...

The ADD petition alleges that imports of CSPV cells from the targeted countries are being sold in the United States at less than fair value (that is, "dumped"). ... Also excluded ...

Clean Energy Associates released a summary of the seven solar module trade policies and solar panel import tariffs currently in place, including AD/CVD rulings, Section 201/302, and the Uyghur Protection Act. These ...

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe ...
