

The moat of the solar power industry

How many GW of solar power are there in 2021?

In 2021, the world reached 920 GW of on-grid solar PV, 9 GW of off-grid solar PV, 522 GW of solar thermal power and 6.4 GW of concentrated solar power (CSP). The last decade saw a surge in solar growth, with the global solar PV market increasing by 445%, raising from 30 GW in 2011 to 163 GW in 2021.

What is the status of the solar market?

The paper also covers the status of the solar market as covered in the World Solar Markets Report. The past decade has seen a significant surge in solar market growth, rising from 30 GW in 2011 to 163 GW in 2021. This market growth has been driven by deployments in Asia in recent years.

Is the solar energy industry ready to reach a terawatt scale?

As the solar energy industry is poised to reach "terawatt scale", there is a need for a sustainable manufacturing and supply chain ecosystem. Global cumulative investment in solar PV manufacturing facilities doubled in the past decade amounting USD 100 billion in 2021 increasing by 50% during 2014-21 as compared to 2008-14.

What is the global solar PV market like in 2021?

The last decade saw a surge in solar growth, with the global solar PV market increasing by 445%, raising from 30 GW in 2011 to 163 GW in 2021. Initially driven by European installations, since 2012 the market has been led by the Asia-Pacific region, which accounted for 57% of annual additions in 2021, and 59% of the global PV fleet.

What is the contribution of solar energy to global electricity production?

While the contribution of solar energy to global electricity production remains generally low at 3.6%, it has firmly established itself among other renewable energy technologies, comprising nearly 31% of the total installed renewable energy capacity in 2022 (IRENA, 2023).

Is solar energy a future energy resource?

The utilization of renewable energy as a future energy resource is drawing significant attention worldwide. The contribution of solar energy (including concentrating solar power (CSP) and solar photovoltaic (PV) power) to global electricity production, as one form of renewable energy sources, is generally still low, at 3.6%.

Over the past decade, the solar installation industry has experienced an average annual growth rate of 24%. A 2021 study by the National Renewable Energy Laboratory (NREL) projected that 40% of all power ...

As we move forward in 2023, the solar industry's declining costs, enhanced energy storage solutions, and grid advancements take centre stage. The industry witnesses increased decentralisation, widespread ...

The moat of the solar power industry

The commercial solar power system is independent of the changing weather. It is a stable and easily distributed energy source compared to fossil fuels for the industrial industry. With ...

The South Africa Solar Energy Market is expected to reach 6.68 gigawatt in 2024 and grow at a CAGR of 10.56% to reach 11.03 gigawatt by 2029. Canadian Solar Inc., IBC Solar AG, Segen ...

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the richest solar resources in the ...

The tandem push of federal investments flowing into clean energy and pull of decarbonization demand from public and private entities have never been stronger. Moving into 2024, these forces could enable renewables to ...

Key updates from the Summer 2024 Quarterly Solar Industry Update presentation, released August 20, 2024.: Global Solar Deployment. About 560 gigawatts direct current (GW dc) of photovoltaic (PV) installations are ...

Increased funds have been allocated to green hydrogen, solar power, and green-energy corridors. ... The power generation industry in India will require a total investment of Rs. 33 lakh crore ...

Solar cells will in all likelihood be the single biggest source of electrical power on the planet by the mid 2030s. By the 2040s they may be the largest source not just of electricity but of...
