

How much electricity does Guyana have?

As of 2020, Guyana has an installed electrical capacity of 337 MW, based on a mix of fossil fuels (85.27%), biomass (12.46%), solar (2.26%) and wind energy (0.01%). However, over a quarter of electricity is lost during transmission and distribution due to faulty infrastructure.

Where does Guyana's Energy come from?

This page is part of Global Energy Monitor's Latin America Energy Portal. More than 90% of Guyana's total energy supply comes from fossil fuels, with the remainder derived from renewables such as wood and sugar cane residue.

What are Guyana's Nationally Determined Contributions?

In the Nationally Determined Contributions, Guyana has committed to develop a mix of wind, solar, biomass and hydro-power to supply both demand of the national grid and the energy requirements for towns and villages in Guyana's hinterland. Guyana has set an ambitious target of achieving close to 100% renewable energy in the power sector by 2025.

What does the Guyana energy agency (GEA) do?

GEA (Guyana Energy Agency) is responsible for developing Guyana's national energy policy and securing its implementation. As of 2021, the GEA is tasked with growing the labor participation of locals by providing training programs to meet the employment demands expected to peak in 2027.
