

Trinidad and Tobago energy storage and sustainability

Does Trinidad and Tobago have fossil fuel resources?

Trinidad and Tobago has abundant local fossil fuel resources, but is taking steps to prepare the societal, legal, regulatory, and economic foundations necessary to support renewable energy and energy efficiency technologies.

Does Trinidad and Tobago have a power generation capacity?

However, Trinidad and Tobago power generation capacity surpasses its current demand (Inter-American Development Bank, 2015), which provides avenues for energy storage through low carbon H₂, MeOH and NH₃ production directly within the local downstream supply chain.

Are solar water heaters sustainable in Trinidad and Tobago?

A Unique Approach for Sustainable Energy in Trinidad and Tobago 148 All the graphs indicate that conditions in terms of resource are favourable for effective deployment of solar water heaters in T&T for most of the year. Insulation levels are relatively high year-round and thus successful water heating using solar energy can be guaranteed.

Does Trinidad & Tobago need energy subsidies?

Unlike many island nations, Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels. However, subsidies for domestic energy consumption have created a fiscal burden on the government that could be reduced through the expansion of alternative transportation fuels, energy efficiency, and renewable energy.

How sustainable is the hotel sector in Trinidad & Tobago?

Trinidad and Tobago has over 6,300 hotel rooms, with a total annual electricity consumption estimated at 76 GWh. It is recommended that the hotel sector invests in EE interventions as part of a holistic sustainability strategy, aimed at increasing overall sector performance. In this context, we propose four general program interventions, to:

How can we save energy in Trinidad & Tobago?

A Unique Approach for Sustainable Energy in Trinidad and Tobago 278 Cooling & Ventilation The only savings here in households without air-conditioning will come from changes in behaviour (turning off fans in unoccupied bedrooms, for example). We assume a 29% reduction here.

5.5.5 Carbon Capture and Storage (CCS) ... energy security and the sustainable development of these states.

1.2 Trinidad and Tobago Energy Environment Trinidad and Tobago's hydrocarbon resources are critical for long term economic growth and development. The country is a net exporter of petroleum products while the petroleum sector is
