

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

Will Tunisia be able to generate 30% of its electricity by 2030?

Tunisia has a target of generating 30% of its electricity from renewable energy sources by 2030. The south of the country, where our Adam and Tataouine power plants are located, is an ideal area for solar power generation.

Where is the first large scale solar power plant in Tunisia?

The first large scale solar power plant of a 10MW capacity, co-financed by KfW and NIF (Neighbourhood Investment Facility) and implemented by STEG, is in Tozeur. TuNur CSP project is Tunisia's most ambitious renewable energy project yet.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

What is a photovoltaic power plant in Tunisia?

In Tataouine, in the governorate of Tunisia that goes by the same name, a photovoltaic power plant is in operation that can reach a maximum installed capacity of 10 MW to supply more than 20 GWh of energy per year to the national grid. The plant is equipped with a solar tracking system that optimises the energy that is produced.

How much electricity does Tunisia get from renewable sources?

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW). In addition to wind and hydro, the Tunisian government plans to use biogas to produce renewable energy.

The power generated at the plant will be supplied to STEG (Société Tunisienne de l'Électricité et du Gaz) under a 20-year power purchase agreement (PPA). The solar power plant was built by Société Énergie Renouvelables Eni Etap (SEREE), which is a joint venture between Eni and Entreprise Tunisienne d'Activités Pétrolières (ETAP).

## Tunisia we are solar power

The Government of Tunisia is taking steps to diversify its energy generation mix by bringing on hydropower and solar energy. As one of the most climate vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs stemming from greater warm spells, and ...

The solar plant is being implemented by Kairouan Solar Plant, a project company registered in Tunisia and fully owned by AMEA Power, and will be located in Metbassta, Kairouan governorate. The project is being financed ...

Tunisia's energy ministry on 17 October launched a "call for projects" to potentially add up to 200MW of solar PV capacity, setting the deadline for proposals at the end of January 2025. ... will sell the electricity "entirely and exclusively" to state power firm STEG under long-term power purchase agreements (PPAs), the ministry says

"This is an important milestone for Amea Power, as we are laying the foundation stone for the country's first privately financed solar project, paving the way for a greener Tunisia," said Hussain Al Nowais, Chairman of Amea Power, which is developing the Kairouan solar project under a public-private partnership (PPP), under which the ...

Tozeur Solar PV Plant is a 10MW solar PV power project. It is located in Tozeur, Tunisia. Skip to site menu Skip to ... We are confident about the unique quality of our Company Profiles. However, we want you to make the most beneficial decision for your business, so we offer a free sample that you can download by submitting the below form ...

The location at Monastir, Tunisia is fairly good for year-round energy generation through solar PV. The amount of electricity that can be generated varies with the seasons. During summer, you can expect to generate about 7.86kWh of electricity per day for each kW of installed solar power.

The construction of the Segdoud solar photovoltaic (PV) power plant in Tunisia is set to start in the second quarter of 2025. ... The development of the Segdoud solar PV plant and other recent solar projects reflects Tunisia's growing focus on renewable energy as a means to meet its electricity needs and support its environmental goals ...

Tunisia's energy ministry on 17 October launched a "call for projects" to potentially add up to 200MW of solar PV capacity, setting the deadline for proposals at the end of January 2025. ... will sell the electricity "entirely and ...

We are proud to have accompanied our partners, the Ministry of Energy and Steg, in the realization of this important step of the energy transition in Tunisia," says Thorsten Schneider, KfW's Director for Energy in North Africa.
