Turkmenistan's government is continuously investing in oil and gas, to modernise and expand the electricity and heat sector by 2020. Moreover, the energy sector is almost fully subsidised, with citizens receiving free electricity, heat and gas up to a certain level of consumption, until 2030, but the government is taking steps to reduce subsidies to curb ...

Turkmenistan Energy and Natural Resources. Samantha A. Carl-Yoder. Already one of the world's largest gas exporters, in order to further develop its remaining gas reserves and resources, Turkmenistan aims to further increase exports both to existing customers and to open up new corridors to international gas markets. These include the rapidly ...

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

New Energy World embraces the whole energy industry as it connects and converges to address the

decarbonisation challenge. It covers progress being made across the industry, from the dynamics under way to reduce emissions in oil and gas, through improvements to the efficiency of energy conversion and use, to cutting-edge initiatives in renewable and low ...
