

Types of roof photovoltaic panels

What are the different types of solar panels?

There are nine main types of solar panels: monocrystalline, polycrystalline, thin film, transparent, Concentrator Photovoltaics (CPV), Passivated Emitter and Rear Contact (PERC), perovskite, solar tile, and solar thermal. Each of these panels comes with its own advantages and disadvantages, and will suit some homes better than others.

What is a 'in roof' solar panel?

'In roof' solar panels are very similar to 'on roof' panels, the only real differences being that with in roof solar panels, the panels serve a dual purpose, acting both as the roof covering and as generators of electricity. Tiles are not required under an in roof system.

What are the different types of solar panels in the UK?

Monocrystalline and polycrystalline solar panels are the two most common types of solar panel in the UK. In the coming years, monocrystalline will take a significant lead over polycrystalline in terms of popularity, as all the best solar panels on the market now are made with monocrystalline.

Are solar panels a good choice for a new roof?

In roof solar panels are the obvious choice when building a new property or when roof refurbishment works are being undertaken. The initial choice is whether to use a complete solar roof system or a system in which the solar takes up only a part of the roof.

Are solar roof tiles better than solar panels?

Solar roof tiles are also around 40% less efficient than solar panels, which means your annual savings will be lower. You should only get solar tiles if you have the money to spend and don't like the look of solar panels, or if you live in a conservation area or listed building.

Are on-roof solar panels better than solar panels?

In many cases they are also less efficient than solar panels at present, making them less beneficial from the perspective of reducing carbon emissions. On-roof solar panels make up the most widely recognisable solar roofing system in the UK.
