

U S Virgin Islands emergency power supply for home

Will the Virgin Islands power system withstand hurricanes?

When the electric power system in the U.S. Virgin Islands is rebuilt, it will be stronger than it has ever been, as the Virgin Islands Water and Power Authority, with help from the Federal Emergency Management Agency, plans to harden the power grid so it can withstand hurricanes with winds of 200 mph. (The original passage mentioned 'hurricanes with 200-mile-per-hour winds' but the question asks specifically about 'hurricanes with winds of 200 mph' so I added the 'with' to make it clearer)

Why is the US Virgin Islands a state of emergency?

U.S. VIRGIN ISLANDS -- Governor Albert Bryan Jr. has declared a State of Emergency to address the ongoing energy production shortfalls impacting the U.S. Virgin Islands. The declaration was made during a special press briefing held at the Government House on St. Thomas.

Should Virgin Islanders be worried about a power outage?

"As a proud native of the U.S. Virgin Islands, I understand the impact of an unpredictable electric system," HUD Acting Secretary Adrienne Todman said in a statement. "Virgin Islanders should not have to worry about losing power every day; business owners should be able to open their stores and restaurants confidently."

How will the funds help St Thomas & St Croix?

The funds will support the purchase of fuel storage infrastructure on St. Thomas and St. Croix from Vitol, part of efforts to modernize the territory's electrical systems after hurricanes Irma and Maria.

"As a proud native of the U.S. Virgin Islands, I understand the impact of an unpredictable electric system," HUD Acting Secretary Adrienne Todman said in a statement. "Virgin Islanders should not have to worry about losing power every day; business owners should be able to open their stores and restaurants confidently."
