

# Unit solar energy Solomon Islands

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaema.

How much electricity does the Solomon Islands produce?

The Solomon Islands produce a total of 103 m kWh of electric energy per year. Per capita, this is an average of 135 kWh. The country can completely be self-sufficient with domestically produced energy, as their total production meets 108 percent of their own requirements.

What is metered electricity in Solomon Islands?

In the context of Solomon Islands, metered electricity is a strategy introduced by the Solomon Islands Electricity Authority (SIEA) to reinforce the cash value of electricity and promote efficient usage techniques.

Who is Deputy Director of the Solomon Islands Energy Department?

Deputy Director for the Solomon Islands Energy Department, Mr Gabriel Aimaema noted the significance of the project to Solomon Islands and expressed appreciation and gratitude of the region to the Government and people of Japan for the provision of the PEC Fund.

What is the Asian Development Bank doing in Solomon Islands?

The Asian Development Bank is working in partnership with the Government of Solomon Islands and Solomon Power to convert electricity networks in five provinces almost entirely to solar power. This project involves the Asian Development Bank in putting a grid-connected solar power plant into operation by SIEA.

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems.
