

United States green speed energy

How much solar power does the United States have?

Installed solar capacity in the U.S. now totals 161 GW, enough to provide about 5% of the nation's electricity, according to the Solar Energy Industries Association. Battery storage also grew substantially in 2023, with installations through Q3 exceeding those of all of 2022.

Is the energy transition racing ahead?

All of the investment so far has slowed the pace at which emissions are growing worldwide, but the amount of carbon dioxide pumped into the atmosphere is at record levels. And yet, from Beijing to London, Tokyo to Washington, Oslo to Dubai, the energy transition is undeniably racing ahead.

Which countries emit the most electricity in 2023?

(China, the US and India are the world's top three emitters.) The report found that electric vehicle sales were at the top of the projected range in 2023, and investment in utility-scale clean electricity reached record levels last year.

The MotionPower Energy Harvester looks like a flattened speed bump with long pedals across the top that press down when tires roll over them. Designed as a roadway-based system for installation where vehicles are required to decelerate or stop, MotionPower technology assists vehicles in slowing down, and in the process, captures the slowing vehicles' motion (kinetic) ...
