

Uruguay exus renewables

Who is Exus renewables?

Exus Renewables is a global independent power producer focused on the development and asset management of renewable energy assets. With a strong presence across Europe, North America and Latin America, Exus takes pride in developing, owning, and operating large-scale, wind, solar and battery storage projects.

Does Uruguay have a wind power auction?

In 2009, Uruguay started holding auctions in which different wind companies from around the world came to bid on how cheaply they'd sell renewable energy to the country. In 2011, Uruguay held an auction intended to secure 150 megawatts of new wind power, which would have represented about 5% of the country's energy generating capacity.

Why did Uruguay rethink its energy strategy?

In the 2000s, facing rising fossil fuel prices and energy demand, Uruguay was compelled to reconsider its energy strategy. Importing oil exposed the country to volatile global markets, as seen in the early 2000s when oil prices soared from \$20 to a record \$145 per barrel.

Is Uruguay a repeatable framework of energy sovereignty for developing countries?

Ramón Mendiz Galain believes so. Uruguay's former national director of energy in the Ministry of Industry, Energy and Mining, who was the impetus for the country's shift away from dirty fuels, has been promoting the country's success as a repeatable framework of energy sovereignty for developing countries.

Should Uruguay switch to green electricity?

Uruguay, one of South America's smallest countries, is attracting outsized attention over its transition to green electricity. It didn't happen simply by building a bunch of wind and solar farms, the architect of the strategy said, but by rethinking the entire energy system. And, he said, other countries could do that too.

How can Uruguay use nontraditional renewables without battery storage?

By balancing complementary resources in particular locations and at particular times of day, Uruguay has been able to incorporate large amounts of nontraditional renewables without any battery storage.
