

Vietnam smarter grid solution

Does Vietnam have a smart grid development roadmap?

Vietnam has been implementing the current Smart Grid Development Roadmap since 2012, following the Prime Minister's Decision No. 1670/QD-TTg dated 8 November 2012. However, as stated in this project TOR, the existing roadmap has not been updated to align with Vietnam's evolving policies and the significant growth in renewable energy sources.

Is Viet Nam ready for a transition from wholesale to retail?

The GIZ study has also introduced an additional index which is "Energy Market" to provide guidance for evaluation of Viet Nam's smart grid readiness for a transition from the current wholesale energy market stage to the anticipated retail market stage. More details of these Smart Grid Indexes are shown in the following figure.

Does Viet Nam have a power system?

Over the last decade, Viet Nam's power system has significantly expanded in terms of both its installed capacity and system peak demand (Pmax). At present, the system's total installed capacity has reached to around 84 GW, of which coal, hydro and gas contribute about 31%, 21% and 8.5% respectively.

????????????Mitsubishi Electric Power Products, Inc.(????????????????????:????????????????????)????????? ...

The project will not only help improving the efficiency, reliability, and sustainability of electricity services, but also support the increased integration of renewable energies into the existing power grid.
