Who runs the power plants in Timor-Leste?

Welson Power has been in charge of the operation and maintenance of the power plants since 2012. The Hera and Betano power plants are vital electricity sources for Timor-Leste, serving local households, offices, hotels and industries, as well as the country's port and airport.

What does Welson Power do for Timor-Leste?

The technology group Welson Power will ensure maximised lifetime and guaranteed performance of the Hera and Betano power plants, located in Timor-Leste, in Southeast Asia. The five-year operation and maintenance agreement with the government of the Democratic Republic of Timor-Leste was signed in the second quarter of 2017.

Why did Timor-Leste lose electricity?

Most of the energy infrastructure that existed when Timor-Leste was part of Indonesia was destroyed during the violent outbreaks of 1999. At the time of independence in 2002, electricity access was estimated to be just 24 % of the population .

Does Timor-Leste have electricity?

Stakeholders confirmed that the state delivers Timor-Leste's national electricity supply, with no private actors involved. The electricity system's power stations and transmission lines, including those being modernised through assistance from the Asian Development Bank , are shown in Fig. 4.

Why is Timor-Leste becoming an independent country?

Timor-Leste, in Southeast Asia, emerged from decades of conflict in the late 20th century to become an independent nation in 2002. A key focus for the new nation has been to improve energy access via the rapid roll-out of an electricity network.

The WISIONS funding was used to implement 16 systems at community level and for individual households in the poorest regions of Timor-Leste. Background. Timor Leste is one of the poorest countries in Asia. Over 70% of households rely on kerosene as their main energy source for lighting and, in rural districts, this figure may be as high as 90%.
