The Africa South region consists of all the remaining countries on the continent. 7 As of 2019, the East Africa power pool, established in 2005, is not interconnected with the remaining pools. A ...

Off-grid systems operate entirely independently from the grid, relying solely on solar and battery storage. How long does an off-grid solar system last? Off-grid systems typically last 20-30 years, but individual components like batteries may need replacement every 5-15 years. How many batteries do you need for an off-grid solar system?

When designing standalone systems, we aim to keep generator run-time and associated costs to a minimum. Generators are costly to purchase, expensive to run, noisy, polluting and are historically the weak link in any stand alone power system. Below are some of our recommendations for generators that might suit integration into an off-grid system.

The Leonardo Off-Grid GE was designed and developed specifically for the production and storage of domestic energy; combined with photovoltaic modules and lead storage batteries, it supplies the house with power until it is completely self-sustaining. The Leonardo Off-Grid GE makes it easy and immediate to use energy produced by photovoltaic modules, for powering ...
