

# Which solar panels should I buy

Which solar panels are best for your home?

As well as having good energy output, SunPower's Maxeon 6AC panels have a high efficiency rating of up to 23 per cent. These crack-resistant panels are ideal for all homes, especially those near the coast, as they're designed to withstand corrosion caused by salty air.

Are solar panels worth buying?

They're absolutely worth buying if you can afford the cost, which is usually between £4,000 and £10,000, because they typically cut your electricity bills by 70%, and you'll break even on them after 13.08 years. Find out more about how solar panels are made on our page.

How do I choose the best solar panels?

For example, solar panels with the highest power ratings are ideal for large households, while more efficient panels are a better choice for small roofs and homes that don't get much sunlight. We'll offer more guidance on choosing the best solar panels for you in our buyers' guide, below.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Why should you choose a solar panel system?

Sunlight is free, so once you've paid for the initial installation, your electricity costs will be reduced. Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK.

Are solar panels a good investment?

Solar panel owners we've spoken to have had some quite different motivations: Wanting to charge their electric vehicle from solar panel electricity so that it's guaranteed 'green energy'. A long-term investment that's future-proofing against electricity price rises. Trying to reduce their carbon footprint and do their bit for the environment.
