

Wind power projects do not have power generation licenses

Do onshore wind turbines need planning permission?

All onshore wind turbines, except for small-scale domestic turbines, require planning permission from the local planning authority (LPA) in England. In September 2023, the government updated national planning policy to provide that LPAs should approve planning applications for an onshore wind farm if:

Do you need planning permission to repower a wind turbine?

You technically need to reapply for planning permission if you're repowering a site. However, the hurdles are much lower, and it's hoped that new planning regulations under Labour will make the repowering process relatively seamless. [How Long Can It Take to Get Wind Turbine Planning Permission?](#)

What is wind turbine planning permission?

In its most basic terms, wind turbine planning permission refers to: "The approval given by the local authority under the power given to it by the 1948 Town and Country Planning Act to allow the building of, or changes to, a building." This responsibility is usually allocated to Local Planning Authorities by Parliament.

Do wind farms need planning permission?

However, repowered sites typically escaped previous planning permission restrictions as they'd already been approved. We'll mention here that most onshore wind farms receive 25-year planning permission. However, most sites tend to repower at the 15-20-year mark, which also involves renegotiating the current land lease.

When should LPAs approve planning applications for an onshore wind farm?

In September 2023, the government updated national planning policy to provide that LPAs should approve planning applications for an onshore wind farm if: It is an area identified as suitable in the local development plan (local plan or a neighbourhood plan) or a supplementary planning document.

Why did David Cameron change planning permission for wind turbines?

Arguing that the public was "fed up" with onshore wind, David Cameron pushed for (and achieved) changes to planning permission for turbines. By altering simple wording in planning permission regulations, he created an essential moratorium on wind turbines in the UK.
